

NIC ANGELO CATIMBANG IDIAN

nic.angelo.idian@gmail.com ❖ +639683476499 ❖ Canaman, Camarines Sur ❖

PROFESSIONAL SUMMARY

BS Information Technology graduate specializing in full-stack development and cloud infrastructure, with hands-on experience through academic and project work in building, containerizing, and deploying web and mobile applications. Experienced in configuring and troubleshooting live websites, with skills in Docker, Docker Compose, PostgreSQL, REST APIs, AWS, Cloudflare, and DNS/hosting configuration. Familiar with Ruby on Rails, React, Flutter, and PHP, with a strong foundation in DevOps, cybersecurity, and software engineering.

WORK EXPERIENCE

SerpNames — IT Fresher (Domain Recovery & Website Setup)

2026

Remote (India based Company)

Calauag, Naga City

- Recovered and restored website content from archived versions when the original site was unavailable.
- Fixed UI and website functionality while configuring Cloudflare DNS, SSL/TLS, and Worker-based routing for live production websites.
- Deployed and restored website files on RunCloud-managed servers via SFTP and resolved deployment issues.

Capstone Project –Barangay Health Services Management System

November 2024 - May 2025

Full-Stack Developer

Gainza, Cam Sur

- Developed a full-stack web and mobile system for managing community health records and services.
- Designed and implemented modules for resident profiling, medical records, pregnancy monitoring, appointments, and equipment management.
- Implemented authentication and role-based access control (RBAC) to secure access across different user roles.
- Integrated frontend applications with backend services and databases to support data management and system functionality.
- Used GitHub for version control and structured collaboration throughout the development process.

Personal Project

2025

Full-Stack Developer

Naga City, Camarines Sur

- Developed a full-stack notification platform using Ruby on Rails, React, Flutter, PostgreSQL, Firebase, and Docker.
- Designed and integrated REST APIs with JWT authentication and role-based access control.
- Containerized backend services using Docker and Docker Compose, and configured PostgreSQL database integration within the containerized environment.
- Implemented Firebase Cloud Messaging for real-time notifications across multiple devices.

EDUCATION

University of Nueva Caceres

August 2, 2021 - June 28, 2025

Bachelor of Science in Information Technology

Naga City, Camarines Sur

CERTIFICATIONS & SKILLS

- **Skills:** Full-Stack Development; REST API Development; Docker & Docker Compose; Cloud & DevOps; PostgreSQL & MySQL; Git/GitHub; System Administration; Cybersecurity; Networking; Technical Troubleshooting
- **Certifications:** AWS Academy – Cloud Operations; Cloud Architecting; AWS Academy – Cloud Developing; AWS Academy – Cloud Foundations; Programming Foundations: Design Patterns; Software Engineer – Requirements Elicitation and Analysis; Agile Software Development; Cyber Threat Management; Business Process Modeling
